

DBX-01

BRIX REFRACTOMETER

STARR Digital Brix Refractometer combines advanced digital technology with the capability to measure both Brix readings (range from 0% to 55%) and refractive index (R.I.)

With compact and lightweight design, the DBX-01 also has built-in Automatic Temperature Compensation (ATC) which ensures accurate measurements even in environments with temperature variations, maintaining precision in diverse conditions.

FEATURES:

- Backlit LCD
- One touch operation
- Fast measurement within 3 seconds
- Temperature Compensation
- IP65 water resistant
- Ultra compact
- Simultaneous Brix + Refractive Index display

Technical Specification:

Range	0.0% to 55.0% Brix
Resolution	0.1% Brix
Accuracy	±0.4% Brix
Sample Size	0.3ml
Size	59 x 31 x 109 mm
Weight	100 grams
