

LHT-PRINTER

Wireless Mini Printer

The LHT Printer is designed for easy, one-touch printing of results. The printer is compatible with the LHT-200 series, LHT-D series, Durometer DSD series and also the CTT Torque Meter.

It uses 2.4G wireless technology for direct, seamless printing and is ultra compact measuring only 90 x 76 x 36mm and weighs just 220gms, so it will easily fit in your pocket!

It operates on internal, rechargeable batteries.

It is as simple as turning on the printer, pressing the go button on the gauge and it prints. So easy to use.

This printer is perfect when tagging items with hardness values. Print a test result and tag your goods instantly for cataloging.

Depending on the gauge being used; data output can include time, date, result, measurement scale and data set average.
